### Experience

#### Hexagon Capabilities Center India | Software engineer

Jan 2023 – Present

- **Collaborated with Cross-Functional Teams:** Worked alongside diverse teams to deliver responsive and user-friendly web operations support, ensuring seamless integration and optimal performance.
- **PowerShell Scripting:** Developed PowerShell scripts for bulk updates and bulk page creation, streamlining processes and enhancing efficiency.
- **Sitecore CMS Management:** Populated and maintained new web content pages using Sitecore 10 CMS, ensuring up-to-date and relevant information.
- **Content Normalization:** Standardized content using Smartsheet and Gather Content to maintain consistency and accuracy across all platforms.
- **Quality Assurance and Bug Fixes:** Addressed QA feedback and fixed content bugs to ensure high-quality deliverables, utilizing UAT based on the Wrike ticketing system.
- **SEO and Analytics:** Generated 404 links reports using the Screaming Frog SEO tool, contributing to improved site performance and user experience.
- **Content Management:** Maintained and organized information through content management, editorial, and desktop publishing domains, ensuring a smooth workflow.

#### Hexagon Capabilities Center India | Internship

Jan 2022 – Jan 2023
